# AWS Certified Solutions SysOps Administrator (Associate)

**Validate your technical skills and  
grow your career.**

Phoenix TS' AWS Certified SysOps Administrator Associate certification course explains deployment, management, and operations on AWS.

An AWS Certified Solutions SysOps Administrator (Associate) is in charge of managing, operating and using systems on the AWS platform.

In addition, they are also in charge of caring for the AWS infrastructure company and handling finances.

## Why Take The AWS Certified Solutions SysOps Administrator (Associate) Course?

Your certification places you at the front of the line.

Passing the exam will allow you to attain an industry-recognized merit from AWS that says: **you know what you're doing**. It proves to your employer that you have the necessary skills and knowledge to earn top dollar when you work for them.

## Increase My Salary

- In 2019, the average starting salary of an AWS SysOps Administrator (Associate) was around \$130,500.

## Be Part Of The Team

- Troubleshoot application deployments, find resolutions to problems at their root
- Write tutorials and how to videos for internal and customer communities.

## Abilities Validated By The Certification:

- Expand, manage, and operate scalable, highly available, and fault-tolerant systems on AWS
- Carry out and control the flow of data to and from AWS
- Select the appropriate AWS service based on compute, data, or security requirements
- Identify appropriate use of AWS operational best practices
- Estimate AWS usage costs and identify operational cost control mechanisms
- Migrate on-premises workloads to AWS

## Recommended Knowledge & Experience:

- Awareness of the AWS tenets – architecting for the cloud
- Firsthand experience with the AWS CLI and SDKs/API tools
- Awareness of network technologies as they relate to AWS
- Awareness of security concepts with hands-on experience in executing security controls and compliance requirements
- Awareness of virtualization technology
- Observation and auditing systems experience
- Grasp of networking concepts (e.g., DNS, TCP/IP, and firewalls)
- Ability to translate architectural requirements

## Scoring:

Domain 1: Monitoring and Reporting 22%  
Domain 2: High Availability 8%  
Domain 3: Deployment and Provisioning 14%  
Domain 4: Storage and Data Management 12%  
Domain 5: Security and Compliance 18%  
Domain 6: Networking 14%  
Domain 7: Automation and Optimization 12%

## Exam Topics:

### ***AWS Certified SysOps Administrator - Associate (SOA-C01)***

#### Domain 1: Monitoring and Reporting

- 1.1 Create and maintain metrics and alarms utilizing AWS monitoring services
- 1.2 Recognize and differentiate performance and availability metrics
- 1.3 Perform the steps necessary to remediate based on performance and availability metrics

## Domain 2: High Availability

- 2.1 Implement scalability and elasticity based on use case
- 2.2 Recognize and differentiate highly available and resilient environments on AWS

## Domain 3: Deployment and Provisioning

- 3.1 Identify and execute steps required to provision cloud resources
- 3.2 Identify and remediate deployment issues
