

CISCO

CCNP – Security Certified Network Professional Security

A CCNP Security certification will help you stand out from the rest by demonstrating your knowledge and skills of security solutions.

To earn the CCNP Security Certification, you must pass two exams; the core exam and then one concentration exam.

Exam 350 – 701: Implementing and Operating Cisco Security Core Technologies

The Implementing and Operating Cisco Security Core Technologies (SCOR) exam is the core exam required for the CCNP certification. The exam tests your knowledge of core security technologies.

Exam Topics

The following Topics are covered:

- Security Concepts – 25%
- Network Security – 20%
- Securing the Cloud – 15%
- Content Security – 15%
- Endpoint Protection and Detection – 10%
- Secure Network Access, Visibility and Security – 15%

Exam Duration: 120 minutes

Participants can prepare for the exam by taking the SCOR – Implementing and Operating Cisco Security Core Technologies course:
