**MICROSOFT**

# Microsoft Certified: Azure Fundamentals

**Validate your technical skills and grow your career.**

This certification demonstrates that the recipient has knowledge of cloud concepts, Azure services, workloads, security, privacy, pricing and support.

It also demonstrates familiarity with general technology concepts, including networking, storage, application support and application development.

## Why Take The Microsoft Certified: Azure Fundamentals AZ-900 Exam?

The need for cloud computing is going to increase in the near future and passing the exam will help you secure an excellent position in the industry.

### Increase Your Salary:

- The average salary for someone who holds a Microsoft Certified: Azure Fundamentals certification is around \$110,000

### Prepare For What's Next:

- Having an Azure Fundamentals certification is a great way to prepare for other Azure role-based or specialty certifications.

### Abilities Validated By The Certification:

- Describe cloud concepts

- Describe core Azure services
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements, and Lifecycles

## Recommended Knowledge & Experience:

- General IT knowledge or any general experience working in an IT environment
- General (sales level) experience on corresponding Microsoft on-premises products, such as Exchange Server, SharePoint, Office Professional, AD RMS and others
- Experience addressing business/legal/security requirements for IT

## Exam Topics & Scoring:

### **Microsoft Certified Azure Fundamentals AZ-900 Exam**

#### **DESCRIBE CLOUD CONCEPTS (15-20%)**

##### ***Describe the benefits and considerations of using cloud services***

- describe terms such as High Availability, Scalability, Elasticity, Agility, Fault Tolerance, and Disaster Recovery
- describe the principles of economies of scale
- describe the differences between Capital Expenditure (CapEx) and Operational Expenditure (OpEx)
- describe the consumption-based model

##### ***Describe the differences between Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS) and Software-as-a-Service (SaaS)***

- describe Infrastructure-as-a-Service (IaaS)
- describe Platform-as-a-Service (PaaS)
- describe Software-as-a-Service (SaaS)
- compare and contrast the three different service types

##### ***Describe the differences between Public, Private and Hybrid cloud models***

- describe Public cloud
- describe Private cloud
- describe Hybrid cloud
- compare and contrast the three different cloud model

#### **DESCRIBE CORE AZURE SERVICES (30-35%)**

##### ***Describe the core Azure architectural components***

- describe Regions
- describe Availability Zones
- describe Resource Groups
- describe Azure Resource Manager
- describe the benefits and usage of core Azure architectural components

### ***Describe some of the solutions available on Azure***

- describe Internet of Things (IoT) and products that are available for IoT on Azure such as IoT Hub and IoT Central
- describe Big Data and Analytics and products that are available for Big Data and Analytics such as Azure Synapse Analytics, HDInsight, and Azure Databricks
- describe Artificial Intelligence (AI) and products that are available for AI such as Azure Machine Learning Service and Studio
- describe Serverless computing and Azure products that are available for serverless computing such as Azure Functions, Logic Apps, and Event Grid
- describe DevOps solutions available on Azure such as Azure DevOps and Azure DevTest Labs
- describe the benefits and outcomes of using Azure solutions

### ***Describe Azure management tools***

- describe Azure tools such as Azure Portal, Azure PowerShell, Azure CLI and Cloud Shell
- describe Azure Advisor

## **DESCRIBE SECURITY, PRIVACY, COMPLIANCE, AND TRUST (25-30%)**

### ***Describe securing network connectivity in Azure***

- describe Network Security Groups (NSG)
- describe Application Security Groups (ASG)
- describe User Defined Rules (UDR)
- describe Azure Firewall
- describe Azure DDoS Protection
- choose an appropriate Azure security solution

### ***Describe core Azure Identity services***

- describe the difference between authentication and authorization
- describe Azure Active Directory
- describe Azure Multi-Factor Authentication

### ***Describe security tools and features of Azure***

- describe Azure Security Center
- describe Azure Security Center usage scenarios
- describe Key Vault

- describe Azure Information Protection (AIP)
- describe Azure Advanced Threat Protection (ATP)

### ***Describe Azure governance methodologies***

- describe policies and initiatives with Azure Policy
- describe Role-Based Access Control (RBAC)
- describe Locks
- describe Azure Advisor security assistance
- describe Azure Blueprints

### ***Describe monitoring and reporting options in Azure***

- describe Azure Monitor
- describe Azure Service Health
- describe the use cases and benefits of Azure Monitor and Azure Service Health

### ***Describe privacy, compliance and data protection standards in Azure***

- describe industry compliance terms such as GDPR, ISO and NIST
- describe the Microsoft Privacy Statement
- describe the Trust center
- describe the Service Trust Portal
- describe Compliance Manager
- determine if Azure is compliant for a business need
- describe Azure Government cloud services
- describe Azure China cloud services

## **DESCRIBE AZURE PRICING, SERVICE LEVEL AGREEMENTS, AND LIFECYCLES (20- 25%)**

### ***Describe Azure subscriptions***

- describe an Azure Subscription
- describe the uses and options with Azure subscriptions such access control and offer types
- describe subscription management using Management groups

### ***Describe planning and management of costs***

- describe options for purchasing Azure products and services
- describe options around Azure Free account
- describe the factors affecting costs such as resource types, services, locations, ingress and egress traffic
- describe Zones for billing purposes
- describe the Pricing calculator
- describe the Total Cost of Ownership (TCO) calculator
- describe best practices for minimizing Azure costs such as performing cost analysis, creating

- spending limits and quotas, using tags to identify cost owners, using Azure reservations and using Azure Advisor recommendations
- describe Azure Cost Management

### ***Describe Azure Service Level Agreements (SLAs)***

- describe a Service Level Agreement (SLA)
- describe Composite SLAs
- describe how to determine an appropriate SLA for an application

### ***Describe service lifecycle in Azure***

- describe Public and Private Preview features
- describe the term General Availability (GA)
- describe how to monitor feature updates and product changes

## **Prepare for your exam:**

The best way to prepare is with first-hand experience. Taking advantage of the opportunities that Phoenix TS provides will assist you with gathering all the knowledge and skills you'll need for certification.

## **Phoenix TS Microsoft Certified: Azure Fundamentals - Learning Pathways**

- **AZ-900T00: Microsoft Azure Fundamentals**

Course Overview Phoenix TS' 2-day, Microsoft Azure Fundamentals (AZ-900T00) instructor-led training and certification boot camp in Washington, DC Metro or Live Online will provide foundational-level knowledge of cloud services and how those services are provided with Microsoft Azure. The course can be taken as an optional first step in learning about cloud services and Microsoft [...]
