AWS

Advanced Developing on AWS

Successfully re-architect legacy, on-premises monolithic applications into a cloud-native microservice driven architecture

BONUS! Cyber Phoenix Subscription Included: All Phoenix TS students receive complimentary ninety (90) day access to the Cyber Phoenix learning platform, which hosts hundreds of expert asynchronous training courses in Cybersecurity, IT, Soft Skills, and Management and more!

Course Overview

This 3-day AWS course build upon the concepts discussed in the course, Developing on AWS. Students will deep dive into advanced development topics such as architecting for a non – cloud environment, legacy applications, and develop an understanding of the Twelve – Factor application methodology. This course will teach students how to:

- Analyze a monolithic application architecture
- Understand the Twelve Factor application methodology
- Develop a microservices based cloud native application
- Implement AWS, API, CLI and SDKs for AWS services
- Demonstrate use of the 6 Rs of migration
- Explain SysOps application to microservices in AWS
- Explain DevOps application to microservices in AWS

Who Should Attend

This course is intended for: Experienced software developers who are already familiar with AWS services

Prerequisites

The prerequisites for this course are completion of the Developing on AWS course, at least 6 months of

real-world experience with the concepts, experience with AWS services and working knowledge of at least one programming language.
