AWS

## Readiness Workshop: The AWS Certified Solutions Architect - Associate Training

**Due to Covid-19 safety restrictions** PhoenixTS will temporarily be unable to provide food to our students who attend class at our Training Center; however, our Break Areas are **currently open** where students will find a constant supply of Coffee, Tea and Water. Students may bring their own lunch and snacks to eat in our breakrooms or at their seat in the classroom or eat out at one of the many nearby restaurants.

The AWS Certified Solutions Architect - Associate exam validates technical expertise in designing and deploying scalable, highly available, and fault-tolerant systems on the AWS platform. In this half-day, intermediate-level workshop, we will explore the exam's topic areas, mapping them to architecting on AWS and to specific areas to study. We will review sample exam questions in each topic area, teaching you how to interpret the concepts being tested so that you can better eliminate incorrect responses.

We recommend that attendees of this workshop have the following prerequisites:

- At least one year of hands-on experience designing and deploying scalable, highly available, and fault-tolerant systems on the AWS platform
- In-depth knowledge of at least one high-level programming language
- Attended course "[Architecting on AWS](#)" or equivalent knowledge

### Price

**\$699**

### Course Outline

- Classroom training
- Group discussion
