PHOENIX TS

Cloud Computing Training

Due to Covid-19 safety restrictions PhoenixTS will temporarily be unable to provide food to our students who attend class at our Training Center; however, our Break Areas are **currently open** where students will find a constant supply of Coffee, Tea and Water. Students may bring their own lunch and snacks to eat in our breakrooms or at their seat in the classroom or eat out at one of the many nearby restaurants.

Course Overview

This training provides the basic knowledge and skills needed to analyze, select, monitor, and protect cloud resources in a vendor-neutral format. Training includes vulnerability management, network reconnaissance and monitoring, connecting networks to clouds, cloud migration, secure policies and procedures, host and network security, identity management systems, and incident response. This course maps to the CompTIA Cloud+ CV0-002 certification exam.

Course Outline

Virtualization Requirements

- Requirements and planning for successful system deployment
- Virtual network considerations
- Computer resources

Deployment and Migration

- Environment testing techniques
- Cloud integration and migration

Security Policies and Compliance

- Security controls
- Cryptography and the cloud
- Applying cryptography

Data and Environment Security

- Data security
- Security automation

Environment Maintenance

- Cloud updates and patching
- Cloud backup
- Cloud environment maintenance

Disaster Recovery and Business Continuity

- Business continuity

Managing Virtual Environments

- Cloud resource provisioning
- Performance analysis

Managing Compute Resources

- Allocating compute resources
- Monitoring resource usage

Deployment Troubleshooting

- The troubleshooting process
- Deployment and capacity troubleshooting
- Automation troubleshooting

Infrastructure Troubleshooting

- Network troubleshooting
- Security troubleshooting
