**PHOENIX TS**

# Jira Fundamentals

**BONUS! Cyber Phoenix Subscription Included:** All Phoenix TS students receive complimentary ninety (90) day access to the Cyber Phoenix learning platform, which hosts hundreds of expert asynchronous training courses in Cybersecurity, IT, Soft Skills, and Management and more!

## Course Description

Phoenix TS' 1-day Jira Fundamentals course starts with a variety of recipes to help manage users and workflows. Participants will learn how to set up custom forms and capture important data with custom fields and screens. Next, they'll gain insights into the latest email capabilities, which will assist with everything from managing outgoing email rules to processing incoming emails for automated issue creation. Later, they'll be guided through running scripts to automate tasks, getting easy access to logs, and even working with tools to troubleshoot problems. The course will also ensure participants understand how to integrate Jira with Slack, set up SSO with Google, and delegate administrator permissions. Finally, participants will cover Jira Service Desk to set up and customize their own support portal, work with internal teams to solve problems, and achieve optimized services with Service Level Agreement (SLA).

## Course Completion

At the conclusion of this course, participants will be able to do the following:

- Understand Jira's data hierarchy and how to design and work with projects in Jira
- Use Jira for agile software projects, business process management, customer service support, and more
- Understand issues and work with them
- Design both system and custom fields to behave differently under different contexts
- Create and design your own screens and apply them to different project and issue types
- Gain an understanding of the workflow and its various components
- Set up both incoming and outgoing mail servers to work with e-mails

## Schedule

Currently, there are no public classes scheduled. Please contact a Phoenix TS Training Consultant to

discuss hosting a private class at 301-258-8200.

## Course Outline

### Module 1

- Jira Architecture
- Understanding Project Types
- Jira Permissions
- Project User Interfaces
- Project Browser
- The Project Administration Interface
- Importing Data into Jira

### Module 2

- Scrum and Kanban
- Running a Project with Scrum
- Running a Project with Kanban
- Configuring Agile Boards
- Creating New Agile Board for Projects
- Including Multiple Projects on Board

### Module 3

- Understanding Issues
- Working with Issues
- Issue Linking
- Issue Cloning
- Time Tracking
- Issues and Comments
- Attachments
- Issue Types and Subtasks
- Subtasks
- Issue Type Schemes
- Issue Priorities

### Module 4

- Built-In Fields
- Custom Fields
- Custom Field Types
