PHOENIX TS

Linux for Developers

Due to Covid-19 safety restrictions PhoenixTS will temporarily be unable to provide food to our students who attend class at our Training Center; however, our Break Areas are **currently open** where students will find a constant supply of Coffee, Tea and Water. Students may bring their own lunch and snacks to eat in our breakrooms or at their seat in the classroom or eat out at one of the many nearby restaurants.

Course Overview

[Take our Free Linux+ Quiz to Test Your Knowledge](#)

This five day Linux+ training course instructs professionals on the most current vendor-neutral skills and knowledge of the Linux Operating System. This training can be taken either in-person or through our live virtual classroom. This course is intended to help IT, System and Network professionals begin or further their careers by teaching them to effectively install, configure and maintain a Linux workstation and work within the command line. It covers:

- Use the standard Linux C libraries
- Utilize most of the standard Linux development tools
- Store data under Linux using DBM and MySQL database systems
- Build graphical user interfaces for the X Windows system using GTK and QT libraries
- Develop their own real world applications

PRICE MATCH GUARANTEE

We'll Match Any Competitor's Price Quote.
