## PMP Testimonials

*Expectational instructor. I am thoroughly confident that the lead and experience, professionalism, thoroughness commitment and organization have set me up for success for my PMP test. Great overall customer service, facilities amenities and location. - Marcela G.*

*I can immediately use the information gained from this course. Extremely useful and relevant. I liked using the SpaceX Dragon resupply program rather than our specific individual programs. We can all relate to it and what we discussed can be applied to our programs. I am a scientist and prefer to work in the technical arena. With that, I also realized that this requires extensive project management which I found not that easy and this is why I chose to take this course. This course has motivated me to look at other courses to take in conflict management team building and team meetings since I lead a team from several Navy and NASA organizations. Mary Ann Crow was one of the best instructors I ever had. She had practical explanations and analogies from experience that were very helpful in understanding concepts. I would definitely recommend her courses and especially this one. Thank you very much and please let me know of other courses offered to NSWC Crane. - Thomas A.*

*Exceptional Instruction. Larry's mastery of the material is very evident, comes from the inside out (does not even need to look at the notes). Very articulate with mastery of all the PMP lexicon. 100% recommend this class to any acquisition professional. - Melissa J.*

*Larry was exceptional at facilitating the Boot Camp this week. Very knowledgeable and engaging on the course content! He really made this virtual experience feel as if I was right there in the classroom with him! Very well done!! - Carol E.*

*Excellent communication and the experience sharing really helped bring the PMI values and techniques home. - Brent H.*

*Enjoyed listening to Ms. Crow's own experience in Project Management as it correlated to the course material. This made it easier to follow and understand. - Celeste V.*
