Introduction to Project Management

BONUS! Cyber Phoenix Subscription Included: All Phoenix TS students receive complimentary ninety (90) day access to the Cyber Phoenix learning platform, which hosts hundreds of expert asynchronous training courses in Cybersecurity, IT, Soft Skills, and Management and more!

Course Overview

Phoenix TS' Instructor-led Introduction to Project Management course is designed to provide the foundational knowledge and tools a beginning project manager needs within the Federal Government

After taking this course participants will be able to:

- Define projects, project management, and project managers
- Identify the importance of the PMBOK and PMI
- Identify the five process groups and ten knowledge areas as defined by the PMI
- Describe the triple constraint
- Perform a project needs assessment and write goals, requirements, and deliverables
- Create key project documents, including the statement of work, project planning worksheet, and project charter
- Build a project schedule by estimating time, costs, and resources
- Understand and use the work breakdown structure
- Create project planning documents, such as a schedule, risk management plan, and communication plan
- Use planning tools, including the Gantt chart, network diagram, and RACI chart
- Establish and use baselines
- Monitor and maintain the project
- Perform basic management tasks, including leading status meetings and ensuring all documents are complete at the end of the project
