#### **RED HAT LINUX**

# Red Hat System Administration I (RH124)

This training introduces experienced IT professionals to the basic skills and tasks for Linux system administration in Red Hat® Enterprise Linux.

**BONUS! Cyber Phoenix Subscription Included:** All Phoenix TS students receive complimentary ninety (90) day access to the Cyber Phoenix learning platform, which hosts hundreds of expert asynchronous training courses in Cybersecurity, IT, Soft Skills, and Management and more!

# **Course Overview**

This 5-day instructor-led training experience is geared towards IT professionals without previous Linux administration experience to introduce and prepare them for working with Red Hat Enterprise Linux 7 (RHEL7).

The course zones in on fundamental and "survival skills" essentials for professionals to perform Linux Sysadmin tasks and responsibilities. This training is the first of two courses that prepares students for the Red Hat Certified System Administrator (RHCSA) certification exam (EX200).

# **Schedule**

Currently, there are no public classes scheduled. Please contact a Phoenix TS Training Consultant to discuss hosting a private class at 301-258-8200.

# **Course Objectives**

- Introducing the command line
- · Physical storage management
- Installing and configuring software components and services

- Network connections and firewall access
- How to monitor and manager system processes
- File management and security
- User and group administration
- Linux file systems
- Install and utilize virtualization for linux systems
- System log files and journal

# **Program Level**

**Basic** 

# **Training Delivery Methods**

Group Live

# **Duration**

5 Days / 32 hours Training

# **CPE** credits

26 NASBA CPE Credits

# Field of Study

Information Technology

# **Advanced Prep**

N/A

# **Course Registration**

Candidates can choose to register for the course by via any of the below methods:

Email: Sales@phoenixts.com

• Phone: 301-582-8200

Website: www.phoenixts.com

Upon registration completion candidates are sent an automated course registration email that includes attachments with specific information on the class and location as well as pre-course study and test preparation material approved by the course vendor. The text of the email contains a registration confirmation as well as the location, date, time and contact person of the class.

Online enrolment closes three days before course start date.

On the first day of class, candidates are provided with instructions to register with the exam provider before the exam date.

# **Course Outline**

# **Accessing the Command Line Interface (CLI)**

- Logging into Linux Systems
- Running Basic Commands in Shells

## **File Management from the Command Line**

• Copying, moving, deleting and organizing files in the Bash shell

#### **Resource Assistance in RHEL**

- Accessing online help systems
- Red hat support resources and utilities

#### **Creating, Editing and Viewing Text Files**

• Creating, viewing and editing text files in text editors and from the command line

#### **Local User and Group Management**

- Managing local users and groups
- Administering password policies

## **Linux File System Permissions for Controlling Access to Files**

- Setting Linux file system permissions
- Evaluating security results of permission settings

#### **Managing and Monitoring Linux Processes**

- Gathering system information
- Accessing and controlling system processes

### **Controlling Services and Daemons**

- Controlling and monitoring with Systemd
  - Network services
  - System daemons

## **Configuring and Securing OpenSSH Service**

OpenSSH for accessing command line on remote systems

## **Analyzing and Storing Logs**

· Locating and interpreting system log files for troubleshooting

#### Managing RHEL Networking

Configuring IPv4 networking on RHEL systems

## **Archiving and Copying Files on Systems**

Archiving and copying files from one system to another system

#### **Installing and Updating Software Packages**

• Downloading, installing, updating and managing software packages from RH and yum package repositories

#### **Accessing File Systems**

Accessing and auditing existing file systems on RHEL Systems

# **RHCSA EX200 Certification Exam**

#### **Exam Details:**

- Candidates must complete RH124 and RH134 training before attempting the RHCSA exam (EX200)
- All exam questions are performance-based
- The exam is 2.5 hours in duration
